ABOUT

Regina was a certified and registered Nuclear Medicine Technologist for over 30 years, which is a specialized area of radiology that uses radiopharmaceuticals to examine organ function and structure. She has also held various positions working with mentally, emotionally and physically challenged individuals of all ages.

As the Director of Clinical Operations, Regina plays a key role in the day to day operations of the OccuMed clinic and clinical support staff. She collaborates with the management staff to assure the OccuMed clinic operates in accordance with the mission and objectives set by the company.

Along with managing the clinic, she is responsible for meeting operational standards by contributing information to strategic plans and reviews, implementing production and productivity while assuring quality and customer services standards. Finding and resolving problems and identifying system improvements to better the clinic's efficiency and satisfaction of our clients is probably what she enjoys most about her position in the OccuMed Clinic.
